

A young girl with long brown hair, wearing a blue shirt and a yellow hair tie, is reaching up with her right hand to touch a large digital display. A young boy with short brown hair is looking at the display with interest. The background shows a classroom with a clock and various educational materials on the wall. The lighting is warm and focused on the children and the display.

Connection through Collaboration

Transforming Education with Advanced Display Technology from Avocor

Innovative Solutions for Interactive and Engaging Learning Environments

Welcome to the Future of Education

At Avocor, we are committed to revolutionizing the educational landscape with our cutting-edge solutions designed to enable students to participate, collaborate and explore new ideas. From non-interactive displays to fully interactive systems, we have the tools you need to create a vibrant and effective educational environment, turning passive listening into active engagement, and creating dynamic learning experiences.

Enhance learning with Avocor

Research shows that visual learning can significantly boost retention rates and conceptual understanding. Displays provide opportunities for students to interact with content in meaningful ways, ensuring that lessons stick long after class ends.

Avocor has a wide range of solutions that make group work more dynamic and accessible. Whether it's solving complex problems or creating multimedia presentations, display technology helps to foster great teamwork and enhance communication skills.

With versatile tools that support both visual and auditory learning, Avocor displays and software cater to every student's needs. Interactive features like touch response*, annotation capabilities*, and multimedia integration allow for personalized learning experiences that adapt to diverse educational needs.

Avocor S Series:

Simple, Secure, Spectacular

The Avocor S Series has been specifically designed for educational environments, supporting effective teaching and learning. Built on an Android platform, the Avocor S Series enables educators to use their favorite applications straight from the display and within the built-in whiteboard platform.

The S Series comes preloaded with a software suite that enables educators to make lessons engaging and interactive, including Bytello Class, Note, Share, Browse and DMS.

Offering seamless integration with Google*, the S Series enables educators to access and utilize Google Drive, Classroom and Meet directly from their classroom display, making lessons more efficient and engaging. With the Google Play Store built-in, teachers can expand their teaching resources with a wide range of educational apps.

Featuring a 4K UHD display, the S Series combines captivating visuals with advanced touch technology to deliver a smooth annotation experience for teachers and students, while versatile mounting options accommodate various classroom layouts.

*Available when adding additional Google EDLA certified OPS Slot-in PC

Bytello Software Suite

Bytello Suite for Education*: A Smart Solution for Interactive Learning

Bytello Class and Bytello Class Pro help teachers manage classrooms effectively by offering real-time tools like quizzes, whiteboards, and performance tracking. These platforms allow content sharing, student engagement, and seamless integration with existing educational tools, making it easy to support both classroom and hybrid learning.

Bytello DMS simplifies IT administration by enabling remote device management. From app installations to system updates, IT teams can handle multiple devices remotely, ensuring that educational environments run smoothly with minimal downtime.

Bytello OS offers an intuitive interface for interactive displays, supporting easy navigation and seamless content sharing, while integrating with key educational apps to foster collaboration.

Bytello Share enables wireless screen sharing, allowing students and teachers to easily connect from any device, enhancing collaboration and reducing the need for cables.

The Bytello Suite is a powerful platform designed to optimize the use of interactive boards in modern classrooms, offering versatile tools that enhance both in-person and remote learning. It includes solutions that empower educators to manage lessons, engage students, and streamline device administration with ease.

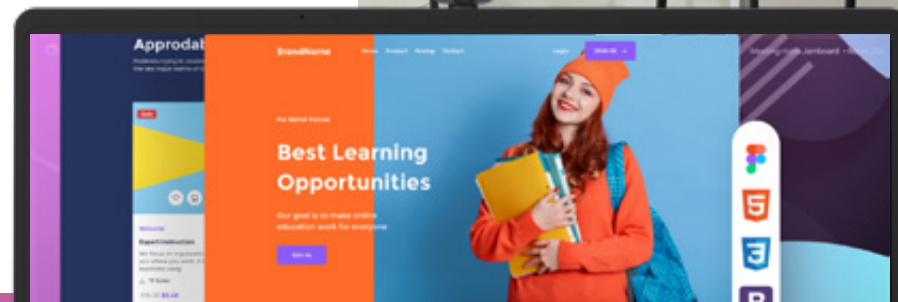

* Bytello software requires a software license and is only available with the Avocor S Series

Google Board 65: Create an Immersive Google Workspace

The Google Series One Board 65 by Avocor is an advanced interactive display designed to enhance teaching and learning in educational environments. Its 65-inch UHD touchscreen, integrated with powerful digital whiteboarding tools like FigJam, Lucidspark, and Miro, transforms classrooms into interactive hubs. Educators can create dynamic lessons, facilitate real-time collaboration, and engage students with clear visuals and audio.

The all-in-one design, featuring a 12MP 4K camera, TrueVoice® audio, and seamless integration with Google Meet, ensures a connected and inclusive learning experience for both in-person and remote students.

Avocor E92 Series:

Expand, Engage, Empower

The Avocor E92 interactive display is designed to revolutionize the classroom, delivering an exceptional learning experience through intuitive technology on an ultra-wide display. Its 5K resolution and ultra-fast touch responsiveness create a dynamic and immersive environment that engages students like never before.

Built with educators in mind, the E92 is a versatile solution that seamlessly integrates with existing software and devices, offering instant compatibility with both Windows and Chrome OS. This allows schools to utilize the platforms they are already comfortable with, minimizing setup time and maximizing teaching efficiency.

The unique form factor enables users to enjoy the regular height of a 75" display combined with additional landscape of a 98" display. Users can also split the screen natively, delivering the experience of two 50" displays side-by-side or use the Picture in Picture (PiP) functionality for a more immersive experience.

Designed for durability, the Avocor E92 is built to withstand the demands of busy classrooms. With its energy-efficient performance, schools can also reduce their environmental impact while benefiting from low operating costs.

Software Included:

DisplayNote Montage

Software That Goes Beyond Collaboration

DisplayNote **Montage**

Instantly share with DisplayNote Montage

Avocor displays feature DisplayNote Montage built-in - our wireless presentation tool that allows teachers and students to share their screens instantly from any device. With Montage, educators can facilitate dynamic and engaging lessons, promote real-time collaboration, and ensure that every student has the opportunity to participate actively. Moderator Mode allows the host to manage screen sharing and participation, all in a secure environment where students and data are protected while touchback control allows users to control shared devices directly from the display, minimizing lesson downtime.

AVOCOR

Remotely manage with Avocor Fuse

FUSE enables teams to configure their device estate and organize products into spaces as they appear in the real world (location, spaces, etc.). This enables IT departments to manage the lifecycle of their Avocor devices efficiently. Management of multiple Avocor devices is also streamlined with FUSE. Avocor products can be managed from anywhere through a single view, reducing local IT support overheads and improving efficiencies.

Enable IT/ AV and Facilities teams to remotely deploy, configure and manage Avocor solutions at scale, across your institution, dramatically improving efficiencies while reducing overheads.

Streamline efficiency and manage any warranty issues for Avocor devices through automated ticket creation when devices stop reporting or fall outside of customizable parameters.

Deliver firmware and software upgrades, as well as activation of digital services to Avocor devices, extending the useful life of the investment.

AVOCOR

Intuitive use with Avocor UiQ

UiQ from Avocor is an intuitive, customizable user interface designed for interactive displays and comes as standard with Avocor interactive displays.*

For educational environments, it simplifies classroom technology by providing seamless access to frequently used tools and applications. This enhances teaching efficiency, promotes collaboration, and makes digital learning more accessible and engaging for both teachers and students.

Optimized user experience through a user-friendly interface

Customizable interface to personalize your display, just how you like it

Seamless integration with all leading UC platforms

Straightforward integration with existing systems

Dynamic Signage with RiseVision

Every Avocor interactive display* ships with RiseVision digital signage software, a dynamic digital signage solution designed for educational institutions. Preloaded with hundreds to useful templates, the platform allows schools and universities to easily display important announcements, schedules, and content across multiple screens. This enhances communication, engages students user experience, improving overall campus experience and information accessibility.

Custom branding available on all templates

Live updates to share information in real-time

Automatically pull and display content from popular services

Easy to use and maintain

Elevate the Classroom and Beyond with Avocor Non-Touch Displays

NON-TOUCH

Avocor K Series

The Avocor K Series provides high-quality visual presentations for classrooms and lecture halls when interactivity is not required. With crystal-clear resolution, a robust design, and available in multiple sizes ranging from 55" to 98", the K Series ensures that everyone sees your content, whether you're presenting a lesson, hosting a seminar, or displaying important announcements utilizing the built-in digital signage functionality.

Engage your students with stunning 4K Ultra HD resolution, wide viewing angles, and seamless integration with existing educational tools and AV systems. Built to last, Avocor's non-interactive displays ensure that your educational content is always delivered with precision and clarity, creating an ideal learning atmosphere.

Avocor X Series

The Avocor X Series direct view LED display is a powerful tool for enhancing teaching and learning in educational environments. Its large, high-resolution screen, available in 16:9 and 21:9 options, offer seamless integration capabilities, making it ideal for interactive lessons and dynamic presentations. With features like wireless screen sharing and multiple input options, educators can easily connect various devices to display multimedia content.

The X Series' modular design ensures easy setup and adaptability to different classroom sizes, promoting collaborative learning and engaging students with vibrant, crystal-clear visuals. This advanced display technology supports diverse teaching methods and enriches the overall learning experience.

Avocor R Series

The Avocor R Series offers a versatile, all-in-one digital signage solution that combines a high-quality display, built-in media player, and smart signage software with remote management capabilities. Ideal for both educational and corporate environments, it simplifies content creation and distribution through a user-friendly interface and a library of customizable templates.

With features like emergency broadcast override and tamperproof design, the R Series ensures reliable and efficient communication across various spaces. Choose between 43" and 55" displays, and enjoy easy installation and cost-effectiveness right out of the box.

Accessories

Avocor accessories are the perfect companions for your Avocor displays, enhancing functionality and versatility in any setting. Designed to complement our displays, our portfolio of high-quality accessories provides seamless integration, ensuring an exceptional interactive experience in classrooms and learning spaces. Elevate your display setup with Avocor's thoughtfully crafted accessory range.

Avocor Mobile Stand

Enhance your classroom with the Avocor Mobile Stand, designed for flexibility and style. This stand accommodates 55" to 105" displays and supports up to 100kg (220.5 lbs); features include manual height adjustment, a storage tray, lockable 360-degree wheels, and it comes in a beautiful metallic gray finish.

Avocor OPS PCs

Avocor's OPS PC range offers powerful, seamless computing solutions that integrate directly into your Avocor displays, enhancing interactivity and performance in educational environments. With options featuring Intel® Core™ processors, SSD storage, and Windows 10 Pro, these OPS PCs provide reliable, high-speed performance for smooth lessons and presentations. Designed for easy installation and maintenance, they offer a clutter-free solution, optimizing your classroom or lecture space with robust, embedded computing at your fingertips.

Avocor EDLA Certified OPS PC

This compact device transforms your display into a powerful all-in-one solution, providing seamless access to the Google Play Store and popular educational apps. With its easy installation, robust performance, and secure Android platform, the OPS Android PC offers a reliable, cost-effective way to elevate interactive learning and streamline classroom technology, making it perfect for modern educational spaces.

Warranty

Avocor's warranty offers educational establishments unparalleled peace of mind, ensuring their investment is protected with best-in-class coverage. Designed specifically for the demands of learning environments, our warranty includes comprehensive support, rapid response times, and hassle-free service options to keep your investment operational. With Avocor's reliable warranty, educators can focus on delivering impactful learning experiences without worrying about technical issues or unexpected costs.

Our commitment to quality and customer satisfaction means that schools and universities can trust Avocor to provide dependable, high-performance solutions that meet the evolving needs of modern education, backed by exceptional support and coverage.
