FUSE by Avocor Remote Device Management Platform

Manage all your Avocor device technology easily - from one platform.

In today's hybrid working environments and the increasing demand for all types of meeting spaces, more technology exists in more spaces and diverse locations than ever before.
Keeping track of your assets and ensuring they are fully operational and updated can be a full-time task.

Introducing FUSE, Avocor's cloud-based software management platform that enables IT/AV and Facilities teams to remotely deploy, configure, and manage Avocor solutions at scale, from anywhere in the world.
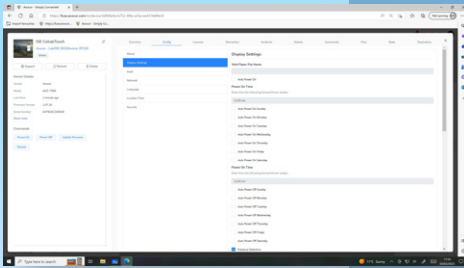

FUSE is available free of charge to Avocor customers.

The benefits of FUSE.

- Optimize the deployment of your Avocor display devices

- Maximize room usage and uptime at scale

- Enable control over your Avocor displays from one central location with no additional hardware or software required

- Manage device lifecycles and updates

- Gain enhanced insights

- FUSE support is enabled on all Avocor displays*

*FUSE is enabled on the following Avocor models - E40+ Series, G Series, H Series, K Series, L Series and R Series
